PROJECTS

Personal Portfolio [↗](#) |

August 2024

- Designed and developed a fully responsive personal portfolio website from the ground up using HTML, CSS, and JavaScript, showcasing professional projects, technical skills, and work experience, with emphasis on user-centered design, cross-browser compatibility, and interactive UI/UX elements.

LeetCode Replica [↗](#) | Group Project

October 2024

- Engineered a responsive LeetCode-style coding platform clone using HTML, CSS, JavaScript, and Bootstrap, replicating key functionalities such as problem listings, code editor interface, and dynamic user interactions, with a focus on performance and mobile-first design.

Speed Typing Test Website [↗](#) |

December 2024

- Developed a full-featured web application to measure and enhance typing speed, integrating real-time feedback, dynamic performance tracking, and interactive UI components to improve user engagement and accuracy.

Food Delivery App [↗](#) |

February 2025

- Created a fully responsive restaurant website using pure HTML and CSS, featuring interactive menu displays, promotional offer highlights, and structured layout for potential integration of online ordering functionality, optimized for mobile and desktop viewing.

BIT Vault [↗](#) |

June 2025

- Designed and developed a fully responsive student assistance website using HTML, CSS, and JavaScript, featuring organized access to academic notes, circulars, notices, previous year questions (PYQs), and other essential educational resources, optimized for usability and accessibility.

EXPERIENCE

Google Script Summer Of Code

December 2024 - January 2025

Role - Contributor

Remote

- Refactored 5+ modules in GSSoC projects, replacing legacy code with modern standards to improve structure and readability
- Achieved a 20 percent boost in code maintainability and reduced technical debt, streamlining future development efforts

Intern at CodSoft and Prodigy Infotech

August-2024

Role - Web developer Intern

Remote

- Successfully completed a web development internship, applying front-end technologies (HTML, CSS, JavaScript) to deliver high-quality, responsive web solutions
- Designed and developed 3 fully functional websites from the ground up, focusing on clean UI/UX, performance optimization, and cross-browser compatibility.

CERTIFICATIONS

- Dev Conquest Hackathon Winner(Technika'24).
- Cleared all internal rounds of Smart India Hackathon (SIH) as a frontend developer with my team [2024]
- Stage Play Winner(Technika'24)
